Core Skills:

- UI Design
- Design Systems
- AI powered Prototypes
- Team Leadership
- Dev Handoff
- Figma
- AI Knowledge bases
- Visual Design
- UX strategy

Professional Profile

Senior designer specialized in leading Design Systems, component governance, internal workflows, design standards, and documentation. Expert in Figma (advanced Auto Layout, scalable libraries, reusable components) and AI powered workflows that take products from prototype to production faster without sacrificing quality.

Mentor to junior and mid-level designers, improving consistency, quality, and operational efficiency.

Strong focus on strategic UX, scalable solutions, and business impact.

My goal is to bring vision, structure, and leadership to product teams—driving user-centered, scalable, and measurable solutions aligned with business strategy.

Work Experience

Senior UX/UI Designer

Evolv Consulting - Client: Toyota North America- Contractor

Jan to June 2026

- Conducted on site UX research inside Toyota's manufacturing plant to understand the daily workflows of production-line employees and identify pain points in existing tools.
- Led end-to-end design of an internal employee platform tailored to factory floor workers, from discovery and information architecture to high-fidelity prototypes.
- Audited and iterated two existing Power BI dashboards, gathering improvement insights from users and stakeholders to define a clear UI enhancement roadmap.
- Built a comprehensive design system from scratch foundations (color, typography, spacing, iconography), component library with all states and variants, usage guidelines, overviews and real-world use cases – and defined Figma variables for scalable token management.

Senior UX/UI Designer

iQor Colombia - Worldwide

2025 - Actually

- Owned the UX and UI design of iQor HUB, the company's main internal platform used across departments one of the most complex and high impact products in the organization.
- Defined new use cases and shipped major feature expansions, working hand-in-hand with Product Directors, DevOps Directors, engineers and diverse business stakeholders.
- Established a formal design handoff process for developers, including component specs, interaction notes, and design guidelines that reduced miscommunication and rework.
- Designed and facilitated usability testing sessions with call center agents and supervisors, translating user feedback into actionable design decisions.

UX/UI Designer

RAIO

2024-2026

- Designed an English-learning platform for a global audience from zero covering user research, product architecture, UI design and a scalable design system.
- Delivered a component library adopted by the full design team, ensuring visual consistency across all product surfaces.

UX/UI Designer

Mercado Libre Latam

2022-2024

- Iterated on specific steps of the seller publishing flow, identifying and resolving friction points that impacted conversion and listing completion rates.
- Participated in multiple rounds of user testing, synthesizing pain points into prioritized design insights presented to product and business stakeholders.
- Conducted UX research and delivered structured presentations to stakeholders to align design decisions with business objectives.

UX/UI Designer

Sistecredito

2021-2022

- Designed the company's main product HUB and multiple supporting applications, including mobile payment collection tools and a dedicated app for call center agents.
- Worked across the full design lifecycle from wireframes to visual design establishing a consistent product language across the company's digital ecosystem.
